COMPANY PROFILE

MegaAudio began in 2007 with one belief — that every drive feels better when sound, technology, and comfort work in harmony. Today, we create infotainment systems, speakers, amplifiers, dash cameras, and automotive accessories designed for modern mobility and real roads.

Our philosophy is simple — engineer with precision, design with purpose, and deliver with consistency. Every MegaAudio product undergoes multi-stage validation inside ISO-certified facilities to ensure long-term stability, durability, and confidence on the road.

We engineer products not just to upgrade a vehicle, but to elevate how people feel inside it — clearer sound, intuitive interfaces, safer environments, and drives that feel a little more personal.

MegaAudio — where thoughtful engineering meets everyday journeys.

R&D & MANUFACTURING CAPABILITIES

ISO-certified facilities equipped for:

- Acoustic tuning & DSP calibration
- PCB and component testing
- Thermal & vibration endurance tests
- Firmware and software validation
- Multi-stage quality inspection
